- **Address:** Flat 8 Pinfold House, Great Heathmead, Haywards Heath, UK, RH16 1FF

Tailored for: Fullstack Developer — Coddle Technologies Pvt Ltd, Calicut/Kozhikode (live opening, 2026)
JD asks: Java/J2EE experience; hands-on Angular/React; Core Java (Collections, multi-threading, design patterns); Hibernate, Spring, REST; JavaScript/jQuery; SQL & NoSQL; UML & ERD modelling; end-to-end development from design to development; code & design review of peers; troubleshooting critical issues while guiding the team.

PROFILE

Full stack developer with 10+ years of Java/J2EE experience and a prime focus on backend, taking features end to end from design through development to production. Expert in Core Java (collections, multi-threading, design patterns), Spring, Hibernate and REST API development, with hands-on Angular front-end delivery. Regularly review peers' code and designs, troubleshoot critical production issues, and guide teams to resolution — currently doing exactly that on a credit card benefits and enrolments platform at Infosys.

KEY SKILLS (MAPPED TO THE ROLE)

- **Core Java:** Collections, multi-threading, design patterns; 10+ years across FinTech, healthcare and aerospace
- **Frameworks:** Spring Boot, Spring MVC, Hibernate/JPA, Vert.x; REST API development (JSON/XML/YAML), Swagger
- **Front end:** Angular (Angular 4 dashboards in production for a global healthcare client), JavaScript, HTML, TypeScript basics
- **SQL & NoSQL:** PostgreSQL and Aurora (indexing, views, performance tuning) · Couchbase (NoSQL document store)
- **Design & modelling:** UML documentation with PlantUML, ERD/database structure analysis (20+ table schemas), design documentation culture with AsciiDoc/Confluence
- **Review & leadership:** Code and design review of peers, defect ownership, guiding multiple teams, incident management
- **Tooling:** Git/Bitbucket, Jenkins/TeamCity, Docker, Kubernetes, Maven, Gradle, SonarQube, TDD/BDD (Spock, Wiremock)

EXPERIENCE

Senior Software Developer — Infosys (May 2019 – Present)

Credit Card Benefits & Enrolments | UK (current) - Handle the credit card benefit and enrolments platform for a major FinTech client — end-to-end feature delivery from design to development. - Manage the development team and production incidents: troubleshooting critical issues, root-cause analysis and guiding the team to resolution. - Handle daily activities of the agile process: stand-ups, sprint planning, backlog refinement, retrospectives and release coordination.

Client Setup application | UK — end-to-end ownership on a Vert.x microservice. - Designed the feature from 400+ edge scenario analysis; presented 10+ use cases to stakeholders for approval before development. - Produced high-quality **UML design documentation** with PlantUML and AsciiDoc, establishing a documentation culture in the team. - Built delete, revert and bulk update REST APIs handling 2,000+ records with cookie-based authentication. - Wrote 400+ BDD integration tests and Spock unit tests reaching 98% coverage.

NEO Web application | UK - Designed and established 10+ Spring Boot REST APIs across multiple modules. - Analysed a 20+ table **database structure (ERD)** and derived optimum performance with indexing and views. - **Reviewed and guided** multiple teams: took ownership of all defects, planned debugging and delivered the target in under 3 months across 3 failure-free releases — 5-star client feedback for problem solving under pressure.

Open-banking software | UK - Architected and developed 9 microservices implementing Consumer Data Standards for 3 major Australian banks; all regulatory audits passed with zero issues.

Comms management & Identity verification | UK/India - Enhanced a communications platform (Adobe SOAP API; 5,000+ OTP and 10,000+ notification requests); troubleshooted memory issues, API errors and dependency failures in production. - Integrated Mitek, Onfido and FrankieOne identity verification into Spring Boot RESTful microservices supporting 1.6M+ customer onboarding.

Full Stack Developer (Software Engineer) — Tata Consultancy Services (December 2015 – May 2019)

Digital Health Administration Dashboard | India — healthcare administration software for a global healthcare technology client, used by 50+ hospitals. - Hands-on **Angular 4** front-end development: user-friendly interfaces and dashboards with Highcharts data visualization. - Developed bed management modules reducing patient wait times by 40%.

Data report tool & Aircraft Assets management (POCs) | India - Built full-stack web applications (Java, Spring Boot, JavaScript front ends) for custom report generation and aircraft engine parts management, applying object-oriented design end to end.

EDUCATION

Bachelor of Technology in Computer Science and Engineering Cochin University of Science and Technology, Kerala, India — June 2011 – June 2015
