

Cheriyam Maman

Senior Full Stack Developer

- **Email:** cheriyansomaman@gmail.com
- **Phone:** 07878187343
- **LinkedIn:** <https://www.linkedin.com/in/cheriyankm>
- **Address:** Flat 8 Pinfold House, Great Heathmead, Haywards Heath, UK, RH16 1FF

Tailored for: Senior Full Stack Developer — Coddle Technologies (Bengaluru, Kerala, Calicut · ₹700–1500k · Full-time)

PROFILE

Full stack developer with 10+ years of diverse experience in software development across FinTech, healthcare, and aerospace domains. Strong Java/Spring Boot backend expertise complemented by front-end development with Angular, HTML, JavaScript and TypeScript. Currently leading credit card benefit and enrolment delivery at Infosys, managing a team, production incidents and daily agile activities. Fast, continuous learner who drives features from design through deployment.

KEY SKILLS

- **Backend:** Java, Spring Boot, Spring MVC, Vert.x, JPA, Hibernate, REST API development (JSON, XML, YAML), Kafka, Schema Registry
- **Frontend:** Angular, HTML, JavaScript, TypeScript, Highcharts data visualization
- **Databases:** PostgreSQL, Aurora, Couchbase
- **DevOps & Tooling:** Docker, Kubernetes (k8s, k9s), Helm, Git/Bitbucket, Jenkins/TeamCity, AWS CloudWatch, Gradle, Maven
- **Quality & Testing:** TDD, Spock/Groovy, BDD, Wiremock, SonarQube, Fortify, Snyk, Swagger documentation
- **Ways of working:** Agile process, DevSecOps, Jira, Rally, PlantUML documentation

EXPERIENCE

Senior Software Developer — Infosys (May 2019 – Present)

Credit Card Benefits & Enrolments | UK (current) - Handle the credit card benefit and enrolments platform for a major FinTech client, delivering benefit configuration and customer enrolment journeys end to end. - Manage the development team and production incidents — triage, root-cause analysis, resolution and stakeholder communication. - Handle daily activities of the agile process: stand-ups, sprint planning, backlog refinement, retrospectives and release coordination.

Client Setup application | UK — Researched and improved Vert.x framework based micro-service. - Analysed over 400 edge scenarios and produced a realistic feature design; walked 10+ use cases through stakeholder approval. - Built delete, revert and bulk update APIs handling over 2,000 records with cookie-based authentication and user id retrieval. - Wrote over 400 BDD integration test cases and Spock unit tests achieving 98% code coverage. - Introduced a documentation culture using PlantUML, AsciiDoc and Confluence macros.

NEO Web application | UK — Designed and established over 10 Spring Boot APIs for multiple modules. - Analysed a 20+ table database structure and derived optimum performance with indexing and views. - Reverse-engineered a legacy Groovy codebase (100+ classes) to determine business logic. - Completed API development of 4 modules under 3 months and supported failure-free deployment across 3 releases; rated 5 stars for communication and problem solving under pressure.

Open-banking software | UK - Led development of open-banking software for 3 major Australian banks; architected and developed 9 microservices implementing Consumer Data Standards (CDS), passing all regulatory audits. - Created Jenkins pipelines automating 5 manual release processes, saving a 3-point story every sprint.

Comms management | UK - Enhanced communication management software using the Adobe SOAP API; set up 5,000+ OTP and 10,000+ notification requests while maintaining system efficiency and reliability.

Identity verification adapters | India/UK - Integrated third-party identity verification services (Mitek, Onfido, FrankieOne) into Spring Boot RESTful microservices; supported a leading UK digital bank launch that onboarded 1.6M+ customers in 20 months.

Full Stack Developer (Software Engineer) — Tata Consultancy Services (December 2015 – May 2019)

Digital Health Administration Dashboard | India — Healthcare administration software for a global healthcare technology client, used by 50+ hospitals. - Developed bed management modules that reduced patient wait times by 40% through intelligent resource allocation. - Implemented user-friendly interfaces and dashboards with **Angular 4** and integrated **Highcharts** data visualization.

Data report tool (POC) | India - Built a native web application letting users select databases, tables and columns to generate custom reports with visualization, secured via an enterprise cloud UAA service.

Aircraft Assets management (POC) | India - Created a web application to manage aircraft engine parts — component catalogue, maintenance schedules and parts ordering — with Java, Spring Boot and object-oriented design.

EDUCATION

Bachelor of Technology in Computer Science and Engineering Cochin University of Science and Technology, Kerala, India — June 2011 – June 2015
