EXPERIENCE

Senior Software Developer — Infosys (May 2019 – Present)

Credit Card Benefits & Enrolments | UK (current) - Handle the credit card benefit and enrolments platform for a major FinTech client; own service reliability in production. - Manage the team and production incidents — triage, root-cause analysis, resolution, and stakeholder communication. - Handle daily activities of the agile process: stand-ups, sprint planning, refinement, retrospectives and release coordination.

DevOps & reliability highlights across Infosys projects - Directed the Docker and Jenkins configuration bringing services into the CI/CD pipeline, reducing deployment time by 30%. - Created Jenkins pipelines automating 5 manual release processes for open-banking releases, saving a 3-point story every sprint. - Incorporated SonarQube, Fortify and Snyk into pipelines, decreasing vulnerabilities by 30%. - Led Wiremock adoption for automated testing of external service integrations, reducing testing time by 40%. - Troubleshot memory issues, API errors and dependency failures in a communications platform handling 5,000+ OTP and 10,000+ notification requests, pinpointing production issues quickly. - Spearheaded Agile and DevSecOps principles through all phases of the SDLC, raising development efficiency by 20%.

Selected delivery work - Architected and developed 9 microservices for open-banking software (Consumer Data Standards) used by 3 major Australian banks — all regulatory audits passed. - Built bulk data APIs (2,000+ records) on a Vert.x microservice with 98% test coverage; supported failure-free deployments across 3 major releases of a Spring Boot web platform. - Integrated identity verification providers (Mitek, Onfido, FrankieOne) into microservices supporting the onboarding of 1.6M+ UK customers in 20 months.

Software Engineer — Tata Consultancy Services (December 2015 – May 2019)

- Developed and maintained healthcare administration software for a global healthcare technology client serving 50+ hospitals; bed management optimisation reduced patient wait times by 40%.
- Built a custom report generation web app secured through an enterprise cloud UAA service.
- Created an aircraft engine parts management application with Java and Spring Boot.
