

Cheriyam Maman

Three.js / WebGL Developer (Front-End Engineer)

- **Email:** cheriyansomaman@gmail.com
- **Phone:** 07878187343
- **LinkedIn:** <https://www.linkedin.com/in/cheriyankm>
- **Address:** Flat 8 Pinfold House, Great Heathmead, Haywards Heath, UK, RH16 1FF

Tailored for: Three.js / WebGL Developer — Revlity, Singapore ("Creating & delivering VR made super easy" · \$20K–\$50K · 0.5%–2.5% equity)

PROFILE

Software developer with 10+ years of experience shipping production web applications, including rich browser-based UI and data visualization work with JavaScript, TypeScript, Angular and Highcharts. Strong computer science fundamentals (B.Tech CSE) with C++ exposure and a track record of rapidly mastering new frameworks — from Vert.x reactive microservices to open-banking standards — making Three.js/WebGL a natural next step. Built an aircraft engine parts visualization platform and interactive healthcare dashboards. Currently leading credit card benefit and enrolment delivery at Infosys, managing a team, incidents and the daily agile process.

KEY SKILLS

- **Browser & UI:** JavaScript, TypeScript, HTML, Angular, Highcharts interactive data visualization; foundations for Three.js/WebGL scene programming
- **Programming:** Java (expert), C++ and Python (basic), strong OOP and design skills
- **APIs & realtime backends:** REST API development, event-driven microservices (Vert.x, Kafka)
- **Tooling:** Git/Bitbucket, Docker, Jenkins/TeamCity, Gradle, Maven
- **Quality:** TDD, BDD, 98% test coverage practices, SonarQube
- **Ways of working:** Agile process, Jira, Rally, fast continuous learning

SELECTED WORK RELEVANT TO 3D/VISUALIZATION

- **Aircraft Assets management (POC), TCS (aerospace client):** Planned and created a web application serving as a centralized platform for **showcasing components of an aircraft engine**, tracking maintenance schedules and enabling parts ordering — component-based visual presentation of complex 3D machinery in the browser.
- **Digital Health Administration Dashboard, TCS (global healthcare technology client):** Implemented intuitive dashboards with **Angular 4 + Highcharts** interactive visualizations used by clinicians in 50+ hospitals.
- **Data report tool (POC):** Built a native web application generating user-configured visual reports from live database selections.

EXPERIENCE

Senior Software Developer — Infosys (May 2019 – Present)

Credit Card Benefits & Enrolments | UK (current) - Handle the credit card benefit and enrolments platform for a major FinTech client. - Manage the development team and production incidents — triage, root-cause analysis and resolution. - Handle daily activities of the agile process: stand-ups, sprint planning, refinement and retrospectives.

Other highlights - Researched and improved a reactive Vert.x micro-service; designed features from 400+ edge scenarios with 98% test coverage. - Designed 10+ Spring Boot REST APIs; delivered 4 modules in under 3 months across 3 failure-free releases (5-star client feedback). - Architected 9 open-banking microservices for 3 major Australian banks, passing all regulatory audits. - Integrated identity verification providers (Mitek, Onfido, FrankieOne) supporting 1.6M+ customer onboarding in the UK.

Full Stack Developer (Software Engineer) — Tata Consultancy Services (December 2015 – May 2019)

- Developed healthcare administration software for a global healthcare technology client (50+ hospitals); bed management optimisation cut patient wait times by 40%.
- Built the Angular 4 + Highcharts dashboard, custom report tool, and aircraft engine parts platform described above.
- Trained 3 months on front-end and back-end technologies (Java/Spring Boot, HTML, JavaScript frameworks).

EDUCATION

Bachelor of Technology in Computer Science and Engineering Cochin University of Science and Technology, Kerala, India — June 2011 – June 2015

HOBBIES

Walking · Games (including 3D/interactive games) · Meeting friends · Sports · News
