- **LinkedIn:** <https://www.linkedin.com/in/cheriyankm>
- **Address:** Flat 8 Pinfold House, Great Heathmead, Haywards Heath, UK, RH16 1FF

Tailored for: Senior Java Software Engineer — Send Technology (insurtech SaaS), London ⚠️ *Sponsorship status unverified — confirm Send holds a Skilled Worker sponsor licence (check the gov.uk register for their legal entity name) before applying.*

PROFILE

Senior Java engineer with 10+ years building SaaS-grade platforms for regulated industries (FinTech, healthcare). Expert in Java, Spring Boot and event-driven microservices, with a strong record of taking underwriting-adjacent workflows — customer enrolment, benefit configuration, identity verification, compliance — from design to production. Currently lead a credit card benefits and enrolments platform at Infosys: managing the team, production incidents and the daily agile process while staying hands-on. Comfortable in a scale-up pace: small teams, broad ownership, direct stakeholder contact.

KEY SKILLS

- **Core stack:** Java, Spring Boot, Spring MVC, Vert.x, JPA/Hibernate, REST APIs (JSON/XML/YAML), Swagger
- **Cloud & infrastructure:** AWS CloudWatch, Docker, Kubernetes, Helm, Jenkins/TeamCity CI/CD, Gradle/Maven
- **Data & messaging:** PostgreSQL, Aurora, Couchbase, Kafka & Schema Registry
- **Quality:** TDD/BDD (Spock, 98% coverage), Wiremock, SonarQube, Fortify, Snyk
- **Product delivery:** Agile process ownership, workflow automation for regulated processes, PlantUML/AsciiDoc design documentation, incident management
- **Front end (working knowledge):** Angular, JavaScript, TypeScript, HTML

EXPERIENCE

Senior Software Developer — Infosys (May 2019 – Present)

Credit Card Benefits & Enrolments | UK (current) - Handle a credit card benefit and enrolments platform for a major FinTech client — configurable product rules and customer journey workflows, the same shape of problem as underwriting workbench automation. - Manage the development team and production incidents — triage, root-cause analysis, resolution and stakeholder communication. - Handle daily activities of the agile process: stand-ups, sprint planning, backlog refinement, retrospectives and release coordination.

Client Setup application | UK - Owned a Vert.x reactive microservice end to end: 400+ edge scenarios shaped into an approved design, bulk update APIs handling 2,000+ records, 400+ BDD tests with 98% coverage.

Open-banking software | UK - Architected 9 microservices implementing Consumer Data Standards for 3 major banks; compliance procedures passed every regulatory audit. - Automated 5 manual release processes with Jenkins pipelines.

NEO Web application | UK - Designed 10+ Spring Boot APIs; 4 modules delivered in under 3 months across 3 failure-free releases; owned all defect resolution (5-star client feedback).

Comms & identity workflows | UK/India - Built OTP/notification flows (5,000+/10,000+ requests) and integrated identity verification providers (Mitek, Onfido, FrankieOne) into RESTful microservices supporting 1.6M+ customer onboarding for a leading UK digital bank.

Software Engineer — Tata Consultancy Services (December 2015 – May 2019)

- Healthcare administration software for a global healthcare technology client (50+ hospitals): bed management modules cut patient wait times by 40%; Angular 4 + Highcharts dashboards.
- Built a UAA-secured custom report generation tool and an aircraft engine parts management platform (Java, Spring Boot).

EDUCATION

Bachelor of Technology in Computer Science and Engineering Cochin University of Science and Technology, Kerala, India — June 2011 – June 2015
